

CM "HOW TO"
DIY MOH-MD

THIS MONTH:

Step Box Install

NOTE: Gang, there is nothing handier to have on your truck than a step box. You can store your gear and keep it organized for quick access. Follow these easy steps to add great storage space for your rig.

STEP BOX

STEP: 1 Remove step or anything on frame assuring you have proper room for new box (rule of thumb is 1" wider than box measures is needed)

STEP: 2 Layout frame with soapstone/silver sharpie to locate holes for brackets

STEP: 3 Once holes are located, drill frame with small pilot hole 3/16" bit or so, then go to 1/2" bit... same for brackets

STEP: 4 Loosely bolt up brackets to frame assuring they are level and box will fit, then tighten

STEP: 5 Slide box in bracket, drill 4 holes, 1 in each corner of bottom of box use 1/4" drill bit and 1/4" bolts to secure box...

STEP: 6 Wipe 'er down and fill 'er up!!!

For this project we used stepbox part #ASB105 and bracket part #CSMMK9022. 4 State Trucks and The Chrome Shop Mafia stock a great selection of many types of custom step boxes as well as the complete Bawer line of stainless steel boxes. For all types of truck parts and accessories call 888.876.7787 or visit www.4statetrucks.com to view the entire selection.
